

Which filter is right for *you*?

	WATER FILTER	FILTER TYPE	KDF	GAC	MICRON RATING	PROTECTS AGAINST	LIFESPAN	INCLUDES
BASIC	TastePURE RV & Marine Water Filter (40645)	Single stage filtration with non-replaceable element; Disposable		✓	20 microns	•bad taste •odor •chlorine •sediment	Up to 3 months	• Single GAC filter only
	TastePURE KDF Water Filter w/ flexible hose protector (40043)	Single stage filtration with non-replaceable element; Disposable	✓	✓	20 microns	•bad taste •odor •chlorine •sediment	Up to 3 months	• GAC/KDF filter • Flexible hose protector
	TastePURE KDF Water Filter, 2-Pack (40045)	Single stage filtration with non-replaceable element; Disposable	✓	✓	20 microns	•bad taste •odor •chlorine •sediment	Up to 3 months	• (2) GAC/KDF filters
	TastePURE KDF Water Filter, 4-Pack (40042)	Single stage filtration with non-replaceable element; Disposable	✓	✓	20 microns	•bad taste •odor •chlorine •sediment	Up to 3 months	• (4) GAC/KDF filters
	TastePURE XL RV & Marine Water Filter w/ flexible hose protector (40019)	Single stage filtration with non-replaceable element; Disposable	✓	✓	20 microns	•bad taste •odor •chlorine •sediment	Up to 3 months	• Single XL GAC/KDF filter • XL flexible hose protector
ENHANCED	Evo Water Filter (40631)	Single stage filtration w/ replaceable cartridges	✓	✓	5 microns	•bacteria •bad taste •odor •chlorine •sediment •etc.	Cartridge lifespan of ~8,000 gallons	• Filter housing • (1) 12" extension hose • (1) replaceable premium spun polypropylene filter cartridge
ULTIMATE	Evo X2 Dual Stage Premium RV Water Filter Kit (40639)	Dual stage filtration w/ replaceable cartridges	✓	✓	0.5 microns	•bacteria •lead •VOCs •cysts •giardia •bad taste •odor •chlorine •sediment •etc.	Cartridge lifespan of ~15,000 gallons	•(2) filter canisters •(1) built-in stand with rubber feet •(1) 4' fresh water hose •(1) canister wrench •(1) replaceable premium spun polypropylene 5-micron sediment GAC/KDF cartridge •(1) replaceable premium 0.5-micron carbon block cartridge
	Evo X3 Triple Stage Premium RV Water Filter Kit (40649)	Triple stage filtration w/ replaceable cartridges	✓	✓	0.2 microns	•bacteria •lead •VOCs •cysts •giardia •bad taste •odor •chlorine •sediment •etc.	Cartridge lifespan of ~15,000 gallons	•(3) filter canisters •(1) built-in stand w/rubber feet •(1) 4' fresh water hose •(1) canister wrench •(1) replaceable premium spun polypropylene 5-micron sediment GAC/KDF cartridge •(1) replaceable premium 0.5-micron carbon block cartridge •(1) replaceable premium 0.2-micron virus protection cartridge

EXTERIOR RV WATER FILTER GUIDE

WATER FILTRATION IS ESSENTIAL

WORDS TO KNOW

Granular Activated Carbon (GAC):

GAC helps reduce taste and odor-causing compounds from drinking water. It is used in water filtration systems to filter chlorine, hydrogen sulfide, and more.

KDF:

KDF removes/reduces chlorine and water-soluble heavy metals. It helps control scale, bacteria, and algae. It is also great for stopping bacteria growth while your filter is not in use.

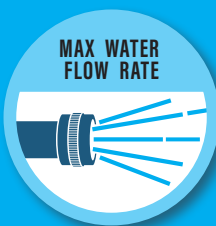

Micron:

A micron is a unit of length equal to one millionth of a meter (0.001 mm). Microns are used to describe the diameter of the holes that the water passes (or filters) through. The smaller the number of microns, the more that is filtered.

THREE TIERS OF FILTRATION

BASIC
ENHANCED
ULTIMATE

ALL OF OUR FILTERS HAVE:

BONUS PRODUCTS:

TastePURE RV Sediment Pre-Filter Water Filtration (40048):

Helps extend the life your inline RV water filter.

Your water source may be filled with dirt, silt, sand, and debris— which can clog your RV filter. The Sediment Pre-Filter blocks clog-causing particulates and removes particles larger than 20-microns.

Works with the TastePURE RV & Marine Water Filter & the TastePURE KDF Water Filter.

TastePURE Portable Water Softener (40655):

Helps reduce the hardness of your RV's water.

Some shore or campground water may have hard water (water with a high mineral content). It may be safe to drink, but on metal, it can cause increased amounts of rust and corrosion. It can also damage and wear down your water-consuming appliances.

The portable water softener offers a high flow rate and has a 10,000-grain capacity (before regenerating with salt).

BASIC

Filters down to **20-MICRONS**

These inline, single-use water filters are the most popular—used mainly by occasional RVers.

They last up to 3 months (with the exception of the XL filter, which lasts 6 months).

The filters containing KDF prevent bacteria growth while your filter is in storage.

PRODUCTS

- 40645 TastePURE RV & Marine Water Filter (Contains only GAC)
- 40043 TastePURE KDF Water Filter with Flexible Hose Protector
- 40045 TastePURE KDF Water Filter, 2-Pack
- 40042 TastePURE KDF Water Filter, 4-Pack
- 40019 TastePURE XL RV/Marine Water Filter with Flexible Hose Protector

ENHANCED

Filters down to **5-MICRONS**

Enhanced filtration is for RVers looking for greater protection than what a basic filter can offer. There's one filter in this tier level: the Evo Water Filter (40631).

The Evo uses a canister body with a replaceable cartridge. The cartridge has a lifespan of ~8000 gallons.

Water goes into the Evo's canister and is forced to pass through the spun polypropylene fiber barrier, then through GAC and KDF.

PRODUCTS

- 40631 Evo Water Filter

Replacement Cartridge options:

- 40621 Evo Spun PP Replacement Cartridge (direct replacement)
- 40624 Evo Premium Spun PP Replacement Cartridge (Offers a filtration upgrade by removing volatile organic compounds (VOCs).

ULTIMATE Filters down to **0.5** or **0.2-MICRONS**

Ultimate filtration is for RVers who want the absolute best in water filtration. There are two multi-stage filters in this tier level: the Evo X2 (40639) & the Evo X3 (40649).

The Evo X2 is a dual stage filter & the Evo X3 is a triple stage filter. Each cartridge filters out different contaminants.

The Evo X2 consists of the following stages:

• **Stage 1:** Acts as a pre-filter (extending the life of the next two cartridges) and is comprised of a 5-micron sediment filter with KDF and GAC to remove heavy sediments, chlorine, bad tastes, and odors.

• **Stage 2:** Contains a 0.5-micron carbon block cartridge that offers protection against lead, volatile organic compounds (VOCs), chloramines, giardia, and other contaminants.

The Evo X3 takes it one step further with a third stage canister/cartridge.

• **Stage 3:** Contains a 0.2-micron electropositive, pleated cartridge that removes viruses, bacteria, and cysts from your water.

Both the Evo X2 and the Evo X3 have a lifespan of ~15,000 gallons.

PRODUCTS

- 40639 Evo X2 Dual Stage Premium RV Water Filter Kit

Replacement Cartridge options:

- 40637 Evo X2 (Stage 1) 5-Micron Replacement Sediment Filter
- 40638 Evo X2 (Stage 2) 0.5-Micron Carbon Block Replacement Cartridge

PRODUCTS

- 40649 Evo X3 Triple Stage Premium RV Water Filter Kit

Replacement Cartridge options:

- 40637 Evo X2 (Stage 1) 5-Micron Replacement Sediment Filter
- 40638 Evo X2 (Stage 2) 0.5-Micron Carbon Block Replacement Cartridge
- 40648 Evo X3 (Stage 3) Replacement Virus Protection Cartridge
