**WEIGHT
DISTRIBUTION
HITCH GUIDE**

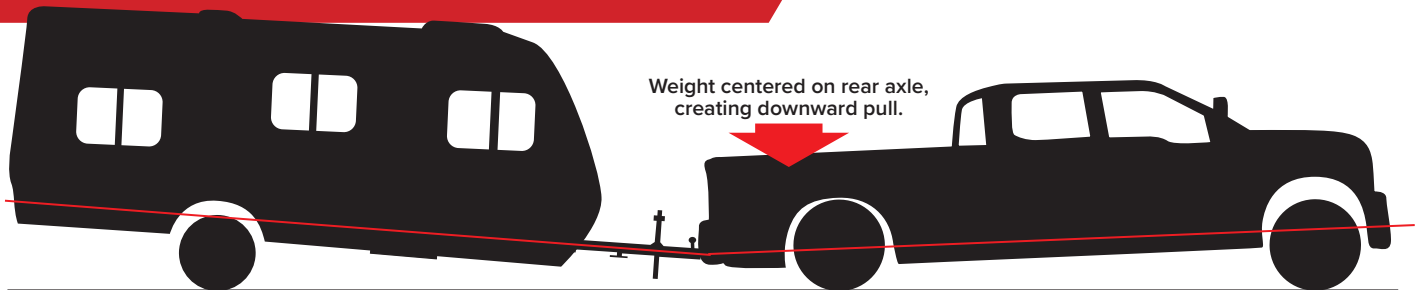

WEIGHT DISTRIBUTION HITCHES

A WEIGHT DISTRIBUTION HITCH provides safe and level towing. It allows the trailer weight to be evenly distributed across the axles of your tow vehicle. Without a WDH, extra weight is put on your tow vehicle's rear axle. Limited weight on your front axle creates light steering and potentially dangerous driving conditions.

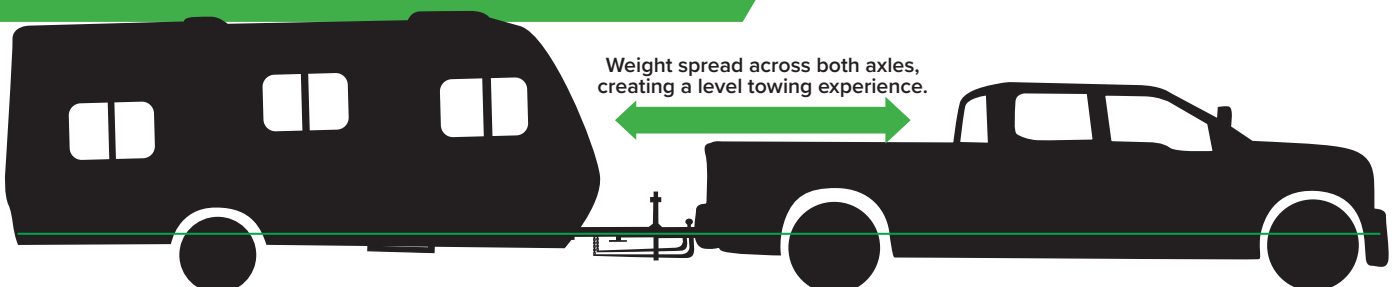

WITHOUT WEIGHT DISTRIBUTION HITCH

DANGEROUS, UNLEVEL TOWING

WITH WEIGHT DISTRIBUTION HITCH

SAFE, LEVEL TOWING

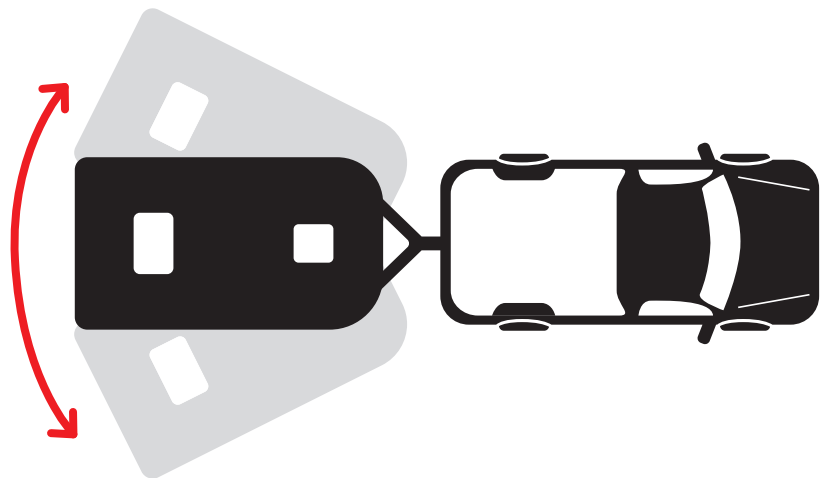

SWAY CONTROL MATTERS

TRAILER SWAY

can happen during a sudden driving maneuver, wind gust, or semi-truck passing. Weight distribution hitches offer sway control options for more stable towing.

TYPES OF SWAY CONTROL:

1. External/Adjustable Sway Control

External/adjustable sway control is manually set. Adjust the sway control to your desired amount with a simple clamp adjustment. Unclamp the sway control to turn it off.

- For external/adjustable sway control, see the Elite*.

* Depending on the Elite model. Models without sway control can receive a sway control add-on (Camco 48380 or 48381).

2. Permanent/Built-In Sway Control

The sway control is permanent and built into the design of the hitch. Two points of steel-on-steel bracket friction stop and correct trailer sway.

-For permanent/built-in sway control, see the Elite-S.

3. Adjustable Sway Control

Simply adjust a clamp to decide how much sway control is exerted on your trailer. You can quickly turn off the sway control feature in dangerous or icy road conditions.

-For adjustable sway control, see the TR3 or ReCurve R3.

4. Adaptive Sway Control

Adaptive sway control constantly adapts to driving conditions. During normal driving, the hitch controls the sway— but when making low speed turns, the sway control will automatically disengage for effortless turning. You can quickly turn off the sway control feature in dangerous or icy road conditions.

-For adaptive sway control, see the ReCurve R6.

WHICH HITCH IS RIGHT FOR YOU?

*Depending on the Elite model.
Models without sway control can receive a sway control add-on (Camco 48380 or 48381).

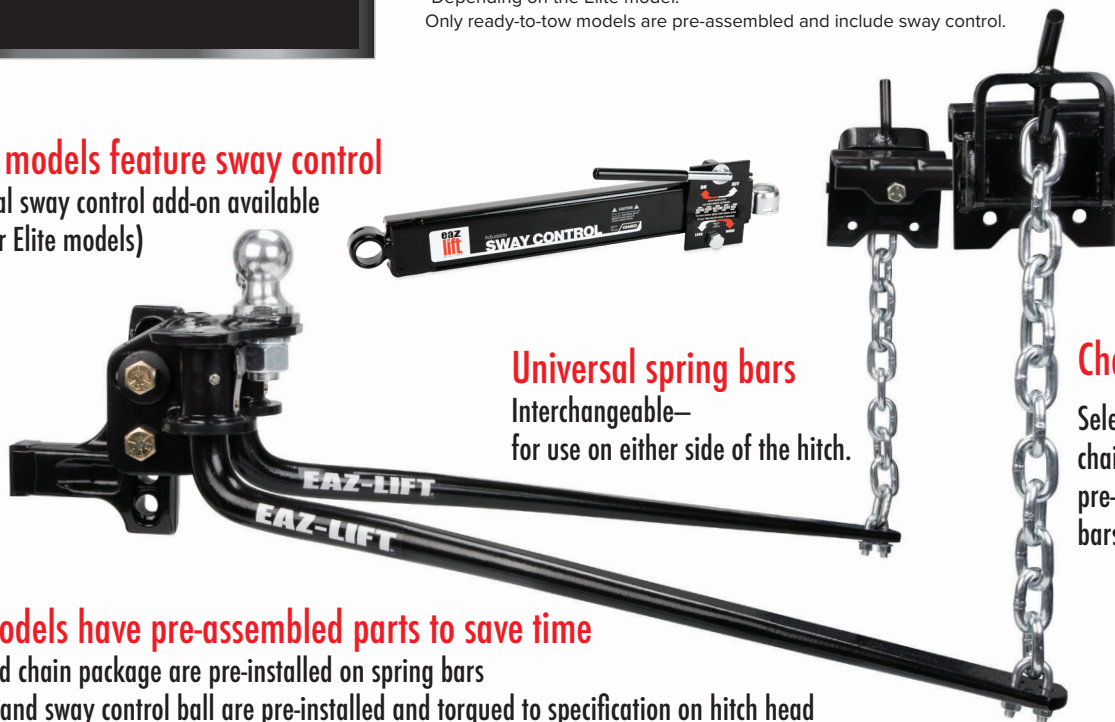

ECONOMICAL

Ready-to-tow hitches with external/adjustable sway control*

*Depending on the Elite model.
Only ready-to-tow models are pre-assembled and include sway control.

Select models feature sway control
(Optional sway control add-on available for other Elite models)

Includes mounting hardware

Universal spring bars
Interchangeable—
for use on either side of the hitch.

Chain-style design
Select models have a chain package pre-installed on spring bars.

Select models have pre-assembled parts to save time

- U-bolts and chain package are pre-installed on spring bars
- Hitch ball and sway control ball are pre-installed and torqued to specification on hitch head

READY-TO-TOW ELITE MODELS WITH SWAY CONTROL

48056	Eaz-Lift Elite Weight Distribution Hitch Kit with Sway Control and Hitch Ball- 600 lb
48057	Eaz-Lift Elite Weight Distribution Hitch Kit with Sway Control and Hitch Ball- 800 lb
48058	Eaz-Lift Elite Weight Distribution Hitch Kit with Sway Control and Hitch Ball- 1,000 lb
48069	Eaz-Lift Elite Weight Distribution Hitch Kit with Sway Control and Hitch Ball- 1,200 lb

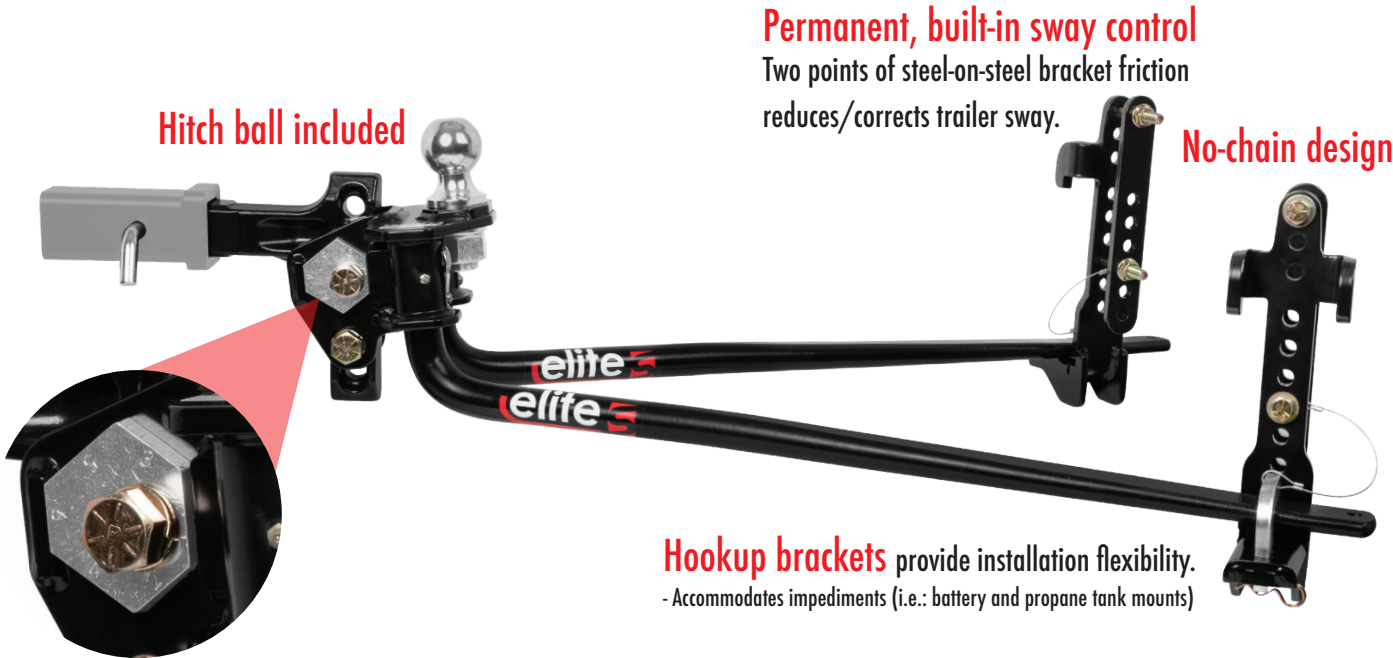

STANDARD ELITE MODELS

(NOT PRE-ASSEMBLED AND DO NOT INCLUDE HITCH BALL OR SWAY CONTROL) *TO ADD-ON SWAY CONTROL, SELECT EITHER CAMCO # 48380 OR 48381

48051	Eaz-Lift Elite Weight Distribution Hitch- 600 lb
48052	Eaz-Lift Elite Weight Distribution Hitch- 800 lb
48053	Eaz-Lift Elite Weight Distribution Hitch- 1,000 lb
48059	Eaz-Lift Elite Weight Distribution Hitch- 1200 lb

Weight distribution hitches with permanent, built-in sway control

Hitch ball included

Permanent, built-in sway control
Two points of steel-on-steel bracket friction reduces/corrects trailer sway.

No-chain design

Hookup brackets provide installation flexibility.
- Accommodates impediments (i.e.: battery and propane tank mounts)

Adjustment washer
modifies the ball mount angle for adjusting spring bar pre-load.

- Installs on top-mount or bottom-mount coupler style trailers
- Faster and easier to install than other weight distribution hitch models
- Back up without disengaging

ELITE-S MODELS

48191	Elite-S Weight Distribution Hitch Kit, 600 lb
48192	Elite-S Weight Distribution Hitch Kit, 800 lb
48193	Elite-S Weight Distribution Hitch Kit, 1000 lb
48194	Elite-S Weight Distribution Hitch Kit, 1200 lb

MOST EFFICIENT

TR3

Weight distribution hitches with fully adjustable sway control

Hitch ball included

No-chain design

Lateral spring bars

Installs on top-mount or bottom-mount coupler style trailers

- Accommodates A-frame trailer configurations
- Accommodates impediments (i.e.: battery and propane tank mounts)
- Accommodates small adjustments without having to reset the ball mount angle

Adjustable sway control (one-bolt)

- Easy on/off sway control
- Better sway control using brake pad material
- Infinite adjustment between zero sway control & factory preset max

- Back up without disengaging
- Trunnion and trailer move as one
- Maintains the same center point
- No need to grease bars
- Sway resistance is achieved independently of the trailer tongue weight
- Quiet operation

TR3 MODELS

48903	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 400 lb
48901	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 600 lb
48904	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 800 lb
48900	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 1000 lb
48902	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 1,200 lb
48906	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 400 lb, 2-Inch Ball
48907	Eaz-Lift TR3 Weight Distribution Hitch Kit with Sway Control, 600 lb, 2-Inch Ball

RECURVE³

ADJUSTABLE SWAY TECHNOLOGY WDH

Weight distribution hitches with fully adjustable sway control

Hitch ball included

Universal frame bracket allows for easier installation around obstructions on trailer frame.

Top-loading spring bars offer more ground clearance and easier installation/removal.

No-chain design

Adjustable sway control (one-bolt)

- Easy on/off sway control
- Better sway control using brake pad material

- Back up without disengaging
- Hitch and trailer move as one
- Maintains the same center point
- No need to grease bars
- No drilling to install
- Quiet operation
